Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 02 October 2007.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 and 19-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferree et al. (U.S. Pat. No. 6,706,068) in view of Robioneck et al. (US Pat. No. 6,106,557). Ferree et al. discloses the following of claim 1: an intervertebral implant, comprising: two articulating parts each having a central axis (see Attachment A), each having a slide surface intersecting the central axes (see Attachment A) and each having an outermost end that can be connected to a bone, wherein: the slide surfaces are curved, the slide surfaces are mutually displaceable (Figures 1-3) at varying angulations and distances, and the slide surfaces are saddle-shaped having a compound radius with at least two inflection points (see Figure 1-3). The implant is made of ceramic as described in col. 4, lines 50-60. Ferree et al. does not teach the connecting elements being removable within an oval recess on the outermost ends of the articulating parts. Robioneck et al. teaches a vertebral implant with such removable connection elements in Figures 1-7 and columns 5 and 6 for the purpose of securing the connection elements to the rest of the prosthesis. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have removable connection elements on the vertebral prosthesis in order to securing the connection elements to the rest of the prosthesis.

In addition, it would be obvious to one having ordinary skill in the art at the time the invention was made to make the first plate and first member separate, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art. *Nerwin v. Erlichman*, 168 USPQ 177, 179.

Response to Arguments

Applicant's arguments with respect to claims 1-15 and 19-34 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ann Schillinger whose telephone number is (571) 272-6652. The examiner can normally be reached on Mon. thru Fri. 9 a.m. to 4 p.m..
